

MOTION BY SUPERVISOR ZEV YAROSLAVSKY

October 9, 2012

National Cyber Security Awareness Month is a national public awareness campaign to encourage everyone to protect their computers and our nation's critical cyber infrastructure. Cyber security awareness covers a wide range of practices designed to keep people and their computer systems safe when accessing the Internet.

The Department of Homeland Security, the National Cyber Security Alliance, the Multi-State Information Sharing and Analysis Center, and the National Association of State Chief Information Officers collaborate in October to showcase what schools, businesses, governments, and home users need to do to protect their computers, data, employees and family members.

**I, THEREFORE, MOVE** that the Board of Supervisors hereby proclaims October 2012 as "Cyber Security Awareness Month" in the County of Los Angeles, and all County residents are encouraged to learn more about cyber security and participate in scheduled webinar cyber security training sessions, gaining useful knowledge that County employees and residents alike can put into practice in homes, schools, workplaces, and businesses.
